# About SeaRates – Revolutionizing Global Freight & Logistics.

SeaRates joined the DP World family in 2020. Together, we are continuing to **digitize** and improve the cargo movement process. We enable our customers to become **more efficient** while increasing the **visibility** and **predictability** of supply chains.

SeaRates Tracking provides real-time container tracking by integrating with major shipping lines. Users can track shipments via container, booking, or bill of lading number. The system offers historical tracking, notifications, and an interactive map. It helps businesses improve logistics efficiency and customer engagement by embedding tracking features into their platforms

# What we offer

SeaRates Tracking provides real-time shipment visibility and seamless integration with major shipping lines, ensuring efficient management of containers from origin to destination. Our solution is designed to enhance logistics operations for businesses of all sizes.

## Supply Chain Visibility

Gain complete transparency into your supply chain by tracking container locations, vessels, and routes in real-time, ensuring up-to-date and accurate statistics at all times.

## Comprehensive Tracking Capabilities

Simplify your logistics operations with SeaRates' real-time container tracking, bringing together comprehensive shipping insights from all relevant sources in one convenient platform.

## All-in-One Solution

Easily monitor your shipments using identifiers like container numbers, bills of lading, or booking numbers, and access data from over 180 global and local shipping lines, all in one place.

## Shipment Management and expectations.

Enhance your customer service by offering branded freight tracking services and providing real-time delivery updates via email, along with detailed shipment history and estimated arrival times.

# Meeting Your Demands

## How Container Tracking Enhances Shipping Efficiency

### Ports and terminal Data analysis

Track how much time each shipment spends waiting at ports and terminals, helping you improve the efficiency of your supply chain.

### Optimizing Shipment Flow

Analyze waiting times across shipments to identify bottlenecks, streamline operations, and enhance overall supply chain performance for faster, more reliable deliveries.

### Managing Cargo Tracking History

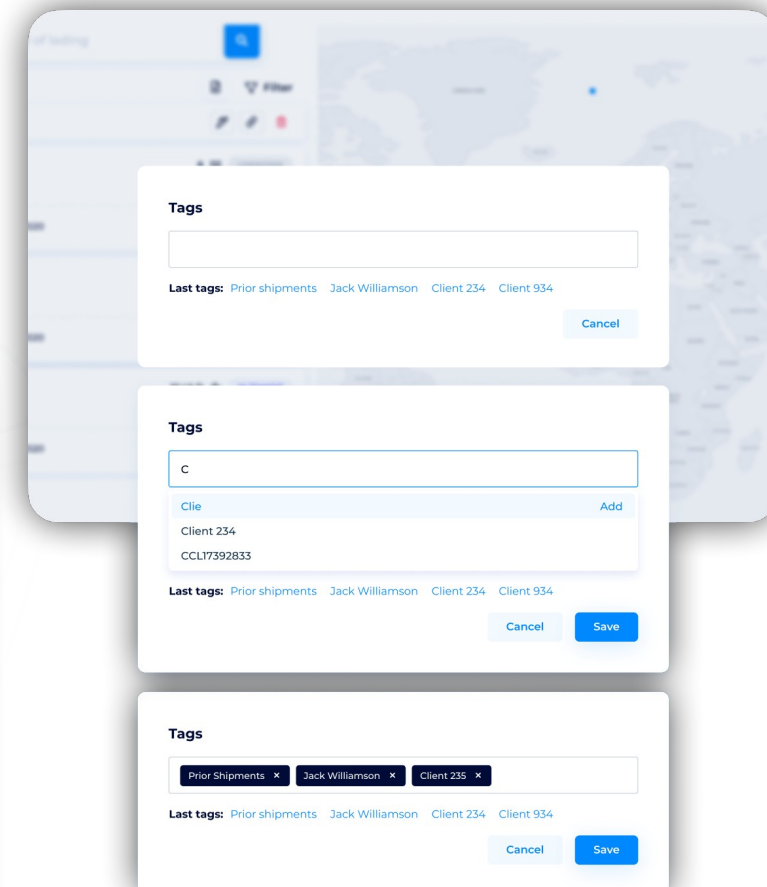

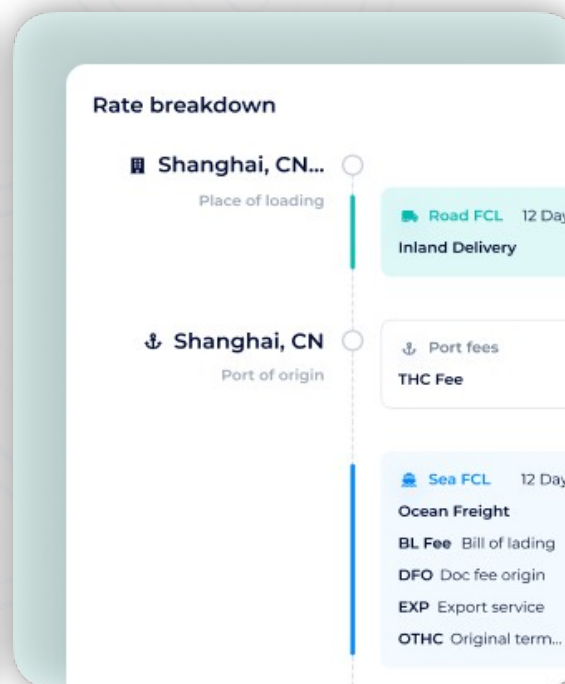

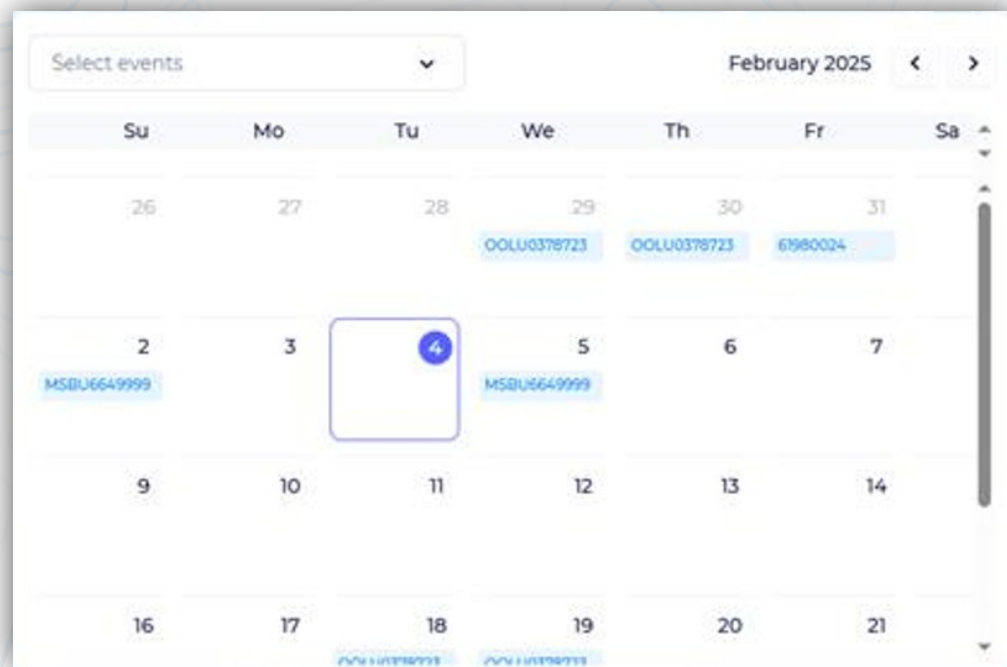

Save and manage your cargo tracking history. You can easily export, import, and sort files by different details to share or edit.

### Interactive Map for Tracking Containers

See your container's location on an easy-to-use map in real-time, making it simple to track shipments anywhere in the world.

# Our Features: The Ultimate Toolkit for Efficient Shipping

SeaRates tracking provides a suite of powerful features, including detailed analytics for shipment insights, a calendar view to manage schedules, tools to track demurrage and detention costs, real-time ship schedule updates, and exceptions tracking to quickly identify and resolve issues, all aimed at enhancing the efficiency and accuracy of your shipment management.

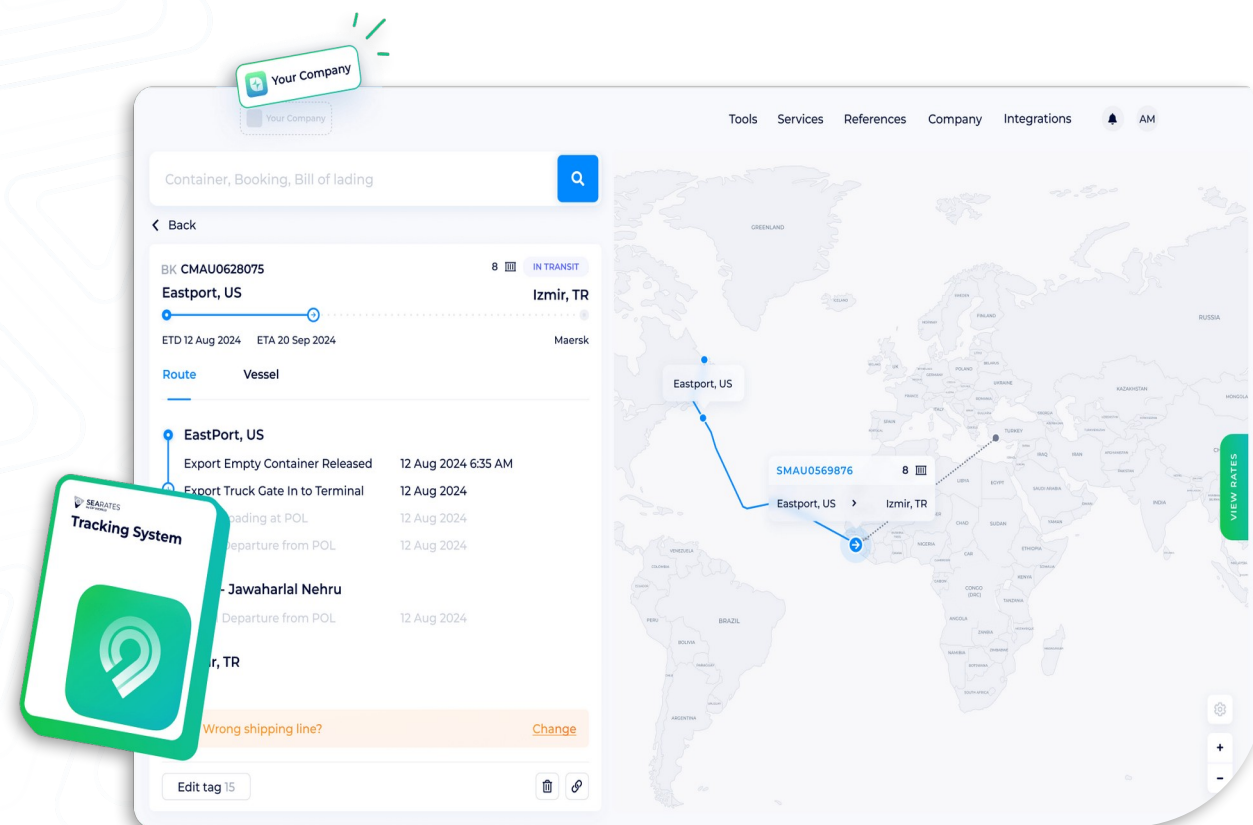

# Solution Overview: Streamlined Shipping with Real-Time Container Tracking

SeaRates Tracking provides an all-in-one, user-friendly solution for global shipment monitoring. By combining real-time tracking with advanced data analytics, it enhances logistics control and efficiency.

Seamlessly integrated with SeaRates ERP and API solutions, it supports bulk container tracking, allowing businesses to manage multiple shipments efficiently.

From monitoring container locations to calculating port wait times, SeaRates Tracking optimizes shipping operations while ensuring greater transparency for businesses and customers.
