Overview of Sea Rates Tracking Tool

A Tool for Real-Time Shipment Visibility

The SeaRates Tracking System offers a comprehensive solution to streamline logistics by providing real-time visibility into shipments across various transportation modes. With robust carrier coverage, it allows businesses to track containers, bills of lading (BOL), Air Waybills, (eAWB) and bookings all in one place. This tool empowers businesses to offer seamless tracking experiences, ensuring customers are always informed and engaged, which drives operational efficiency and boosts customer satisfaction.

12M+ TEUs tracked last year

Tracking ~8% of global trade

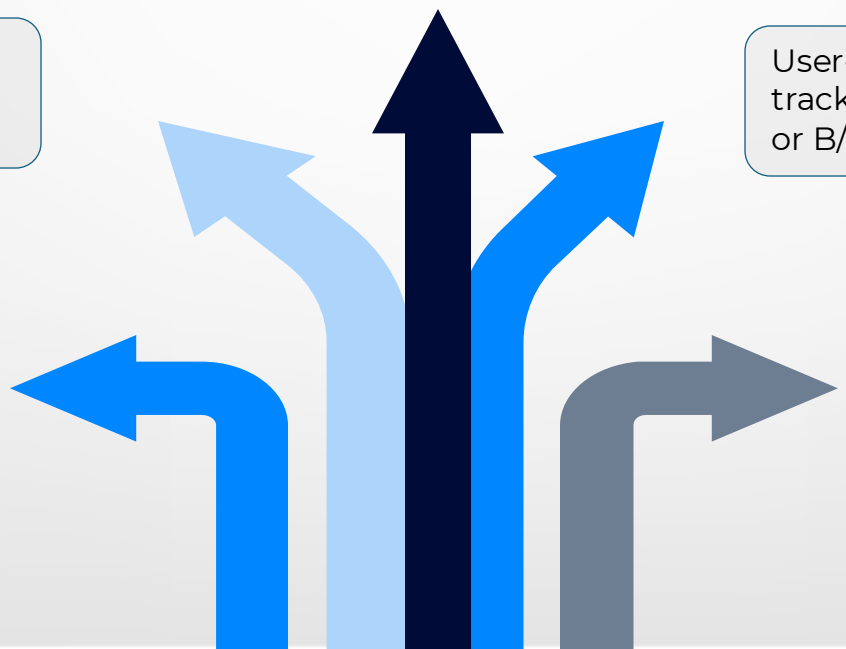

30M+ website sessions

Why Choose SeaRates Tracking?

A Smarter, Faster, and More Connected Way to Track Shipments

Tracking shipments shouldn't be complicated. The SeaRates Tracking Tool was designed for ease of use, ensuring anyone can track shipments effortlessly. SeaRates delivers real-time shipment insights, enabling businesses to make faster, data-driven decisions.

API integrations allow seamless shipment tracking and provide milestone updates, status, and more through secure, automated systems.

Real-Time Updates Instant, continuous updates, no waiting for periodic reports.

User-Friendly Interface. Anyone can track with just a container number or B/L number.

SeaRates streamlines tracking across multiple logistics channels, delivering enhanced visibility and control through a single platform.

Milestone notifications and updates, providing complete shipment details including location, status, ETA, and transshipment information
